

MOHAMMADALI AMERI FARD NASRAND

Curriculum Vitae

PERSONAL AND CONTACT INFORMATION

First Name: **MohammadAli**

Email: **amerifar@ualberta.ca**

Last Name: **Ameri Fard Nasrand**

Linkedin: www.linkedin.com/in/mohammad-ali-ameri

Hometown: **Edmonton**

Address: **#401 10530 83 Ave, AB, Canada, T6E 2C9**

SUMMARY

Ph.D. candidate in Structural Engineering at the University of Alberta with expertise in risk and reliability analysis, numerical modeling, and pipeline integrity. Experienced in risk-based inspection and maintenance planning, integrating Bayesian decision analysis, reinforcement learning, and probabilistic methods for pipeline integrity management. Strong background in structural health monitoring, finite element analysis (FEA), and predictive modeling for pipeline degradation under stress corrosion cracking (SCC) and fatigue growth. Proven ability to collaborate on industry-focused research, publish in high-impact journals, and develop AI-driven solutions for pipeline integrity management.

EDUCATION

University of Alberta, Canada

Sep 2021 - Aug 2026

PhD Student, Structural Engineering

Overall GPA: 3.9/4

Department of Civil Engineering

Sharif University of Technology, Iran

Sep 2018 - Jan 2021

M.Sc., Structural Engineering

GPA: 17.86/20 (4/4)

Department of Civil Engineering

(Top 15%)

Sharif University of Technology, Iran

Sep 2014 - Sep 2018

B.Sc., Civil Engineering

GPA: 17.23/20 (3.75/4)

Department of Civil Engineering

(Top 20%, Honor Student)

TECHNICAL STRENGTHS

Pipeline Risk Management

API 580/581, API 579, CSA Z662, RBI Planning

Programming and Data Analytics

Python, Matlab, C++, SQL, Power BI

Structural Analysis and Design

Abaqus, Sap 2000, Etabs, AutoCad, Opensees

Structural Health Monitoring

Kalman Filter, Bayesian Model Selection

WORK EXPERIENCE

Ph.D. Researcher at the University of Alberta

Sep 2021 – June 2026

Ph.D. Project: *Risk-Based Inspection and Maintenance Planning for Pipeline Integrity Management against Cracks* (Supervisor: Prof. Yong Li)

- 1) Developed decision-making frameworks in Python, integrating Bayesian analysis, reinforcement learning, and reliability-based optimization to enhance pipeline integrity management.
- 2) Performed probabilistic failure analysis using Monte Carlo simulation and FORM/SORM methods to assess cracked pipelines reliability under stress corrosion cracking (SCC) and fatigue.

- 3) Built Python-based predictive models for pipeline maintenance scheduling, combining statistical analysis with AI-driven optimization.
- 4) Optimized inspection intervals and repair thresholds using Value of Information (VoI) and cost-benefit analysis under uncertainty.
- 5) Working under supervision of Prof. Samer Adeeb to parallelize Monte Carlo sampling for structural reliability purposes in MecSimCalc platform.¹
- 6) **Lab2Market Program:** Participated in entrepreneurship training focused on translating academic research into practice through customer discovery, market analysis, and business model development for pipeline integrity management software.

M.Sc. Researcher at Sharif University

Sep 2018 – Aug 2021

M.Sc. Project: *Probabilistic Structural Health Monitoring for Rapid Damage Detection after Earthquakes* (Supervisor: Prof. Mahsuli)

- 1) Designed a Bayesian-based framework in MATLAB for probabilistic system identification and rapid post-earthquake damage detection.
- 2) Integrated sensor and mobile data to support real-time decision-making in intelligent emergency response systems.
- 3) Modeled and analyzed different concrete and steel structures in SAP2000 and ETABS to evaluate damage potential under seismic excitations.
- 4) Contributed to developing probabilistic models that improved regional emergency resource allocation and resilience planning.

Internship – Municipality of Tehran

Jul 2018 – Sep 2018

- 1) Gained practical experience in site supervision, quantity estimation, labor management, and construction safety compliance.
- 2) Supported project design and documentation processes for municipal infrastructure development.
- 3) Checked and validated structural designs in ETABS and AutoCAD.

TEACHING ASSISTANTSHIPS

Statics/Dynamics/Math 102 at ESSC, UofA	Sep 2022 - Present
Co-up Marker, UofA	April 2025
Numerical Methods for Engineers	Jan-Apr 2022
Resilience of Infrastructures	Feb-Jun 2020
Introduction to Earthquake Engineering	Feb-Jun 2020
Concrete Technology Laboratory	Sep-Dec 2017

¹<https://docs.mecsimcalc.com/advanced-applications/mp-monte-carlo>

AWARDS AND HONORS

Alberta Innovate Graduate Student Scholarship (2024).
Honor Award in Construction Innovation Center (CIC) Forum at the U of A (2024).
Third Place Award in Construction Innovation Center (CIC) Forum at the U of A (2022).
Silver Medal in National Civil Engineering Olympiad in Iran (2018).
Ranked 5 among more than 30000 participants in Iranian MS.c. entrance exam (2018).
Scholarship Foundation Award from Iran's National Elite Foundation(2018).
Acceptance for M.Sc. degree as a talented student(2018).
Selected sportsman student at the Second Student Recognition Ceremony at SUT. (2017).
Ranked 300 among more than 125000 participants in Iranian BS.c. entrance exam (2014).
